Remark

- This Office Action is in response to applicant's amendment filed on August 3, 2005, which has been entered into the file.

Drawings

1. The drawings were received on August 3, 2005. These drawings are accepted.

Reasons For Allowance

2. The following is an examiner's statement of reasons for allowance: of the prior art references considered, none has disclosed an *optical device*, reflecting in the wavelength range between 10 nm and 20 nm, wherein the optical device comprises *alternate* superposed first and second layers, wherein the first layer being made of *metal or metal compound* and the *second layer* being formed by an *amorphous silicon* chosen from a-Si-H_x, a-Si-CH_x, a-Si-C_x, a-SiOH_x, a-Si-F_x, a-Si-FH_x, a-Si-N_x, a-Si-NH_x, *x being comprised between 0.01 and 0.3*, as set forth in the claims.

The prior art reference US Patent issued to Abeles et al (PN. 4,684,565) teaches a multilayer X-ray mirror wherein amorphous silicon (a-Si-H_x) is used as one of the layer materials for forming the multilayer mirror. Abeles et al teaches that the hydrogen content of the amorphous silicon (a-Si-H_x) depends on the deposition condition of the layer, but fails to teach explicitly that x has the value in the range of 0.01 to 0.3, as specifically set forth in the claims of the instant application.
